FOOD CATEGORY DETAILS

Fresh meat, poultry, and game (08.1)

Description:

Fresh products are usually free of additives. However, in certain circumstances, additives are necessary. For example, colours are used for certification stamps on the surfaces of fresh cuts of meat, and are indicated in the FCS with a notation for "stamping, marking or branding the product." Additionally, coatings, such as glazes and spice rubs, may be applied to meat products prior to marketing to the consumer (e.g. glazed ham, and barbecued chicken). In the FCS, this is indicated with a notation for "use as a glaze or coating (surface treatment)." It should be noted that the coatings marketed per se are included in food categories 04.1.2.8 (fruit-based glazes, e.g., for ham) and 12.2 (spice rubs).

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

This food category is listed in the **Annex to Table 3**. Unless specifically indicated below, food additive provisions implied by **Table 3** do not automatically apply to this category.
