

## GSFA Online

FRANÇAIS | ESPAÑOL

Updated up to the 48<sup>th</sup> Session of the Codex Alimentarius Commission (2025)

### FOOD CATEGORY DETAILS

#### Cured (including salted) non-heat treated processed comminuted meat, poultry, and game products (08.3.1.1)

##### Description:

Salted products are treated with sodium chloride. Dry cured (dry pickled) products are prepared by rubbing salt directly on the meat surface. Wet pickle cured products are prepared by submerging the meat in a brine solution. Pump cured products are prepared by injecting brine into the meat. Curing may also be achieved by addition of additives. Also includes smoked products.<sup>1</sup> Examples include: chorizos (spicy pork sausages), salami-type products, salchichon, tocino (fresh, cured sausage), pepperoni, and smoked sausage.

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

Items in uppercase (e.g. **PHOSPHATES**) refer to food additive groups.

## GSFA Table 3 Provisions

The following additives, as indicated by **Table 3**, may be used in this food category under the conditions of good manufacturing practice (GMP) as outlined in the Preamble of the Codex GSFA.

| INS No. | Food Additive or Group                   | Acceptable in Foods Conforming to the Following Commodity Standards                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
