Updated up to the 48th Session of the Codex Alimentarius Commission (2025)

FOOD CATEGORY DETAILS

Fish and fish products, including mollusks, crustaceans, and echinoderms (09.0)

Description:

This broad category is divided into categories for fresh fish (09.1) and various processed fish products (09.2 – 09.4). This category includes aquatic vertebrates (fish and aquatic mammals (e.g., whales)), aquatic invertebrates (e.g. jellyfish), as well as mollusks (e.g. clams, snails), crustaceans (e.g. shrimp, crab, lobster), and echinoderms (e.g. sea urchins, sea cucumbers). Fish products may be treated with coatings, such as glazes and spice rubs, prior to marketing to the consumer (e.g. glazed frozen fish fillets). In the FCS, this is indicated with a notation for “use as a glaze or coating (surface treatment).”

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

One or more subcategories of this category are listed in the **Annex to Table 3**. Unless specifically indicated below, food additive provisions implied by **Table 3** do not automatically apply to this category.

No provisions found for food category 09.0.
