

## GSFA Online

Updated up to the 48<sup>th</sup> Session of the Codex Alimentarius Commission (2025)

### FOOD CATEGORY DETAILS

#### Dried and/or heat coagulated egg products (10.2.3)

##### Description:

Sugars are removed from the purified whole egg, egg yolk or egg white, which is then pasteurized and dried.

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

#### GSFA Provisions for Food Category 10.2.3

| INS No.  | Food Additive or Group                                 | Max Level    | Notes                                                                                                                                                                                      | Defined In |
|----------|--------------------------------------------------------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 150d     | Caramel IV - sulfite ammonia caramel                   | 20,000 mg/kg |  Note 161                                                                                               | 10.2       |

| 472e     | Diacetyltartaric and fatty acid esters of glycerol     | 5,000 mg/kg  |                                                                                                                                                                                            | 10.2.3     |
|          | ETHYLENE DIAMINE TETRA ACETATES                        | 200 mg/kg    |  Note 47<br> Note 21 | 10.2.3     |
| 243      | Lauric arginate ethyl ester                            | 200 mg/kg    |                                                                                                                                                                                            | 10.2       |
| 475      | Polyglycerol esters of fatty acids                     | 1,000 mg/kg  |                                                                                                                                                                                            | 10.2       |
| 476      | Polyglycerol esters of interesterified ricinoleic acid | 1,000 mg/kg  |                                                                                                                                                                                            | 10.2       |
|          | SORBATES                                               | 1,000 mg/kg  |  Note 42                                                                                              | 10.2.3     |
|          | SORBITAN ESTERS OF FATTY ACIDS                         | 500 mg/kg    |  Note 452                                                                                             | 10.2.3     |
|          | STEAROYL LACTYLATES                                    | 5,000 mg/kg  |                                                                                                                                                                                            | 10.2.3     |
| 1505     | Triethyl citrate                                       | 2,500 mg/kg  |  Note 47                                                                                              | 10.2.3     |

Items in uppercase (e.g. **PHOSPHATES**) refer to food additive groups.

#### GSFA Table 3 Provisions

The following additives, as indicated by **Table 3**, may be used in this food category under the conditions of good manufacturing practice (GMP) as outlined in the Preamble of the Codex GSFA.

| INS No. | Food Additive or Group | Acceptable in Foods Conforming to the Following Commodity Standards                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 260     | Acetic acid, glacial   | CS 302-2011<br>CS 273-1968<br>CS 319-2015<br>CS 221-2001<br>CS 70-1981<br>CS 117-1981<br>CS 249-2006<br>CS 291-2010<br>CS 262-2006 (for use in cheese mass only)<br>CS 275-1973<br>CS 298R-2009<br>CS 160-1987 (only for use in heat pasteurized products to maintain the pH at less than or equal to 4.6, and in heat sterilized products)<br>CS 306-2011<br>CS 355R-2023<br>CS 322R-2015<br>CS 243-2003 (acidity regulator or preservative; use as a preservative is restricted to flavoured fermented milks heat treated after fermentation and drinks based on fermented milk heat treated after fermentation) |
