FOOD CATEGORY DETAILS

Egg products (10.2)

Description:

Products that may be used as replacement for fresh eggs in recipes or as a food (e.g., omelet). They are produced from fresh eggs by either (i) mixing and purifying the whole egg; or (ii) separating the egg white and yolk, and then mixing and purifying each separately. The purified whole egg, white or yolk is then further processed to produce liquid, frozen or dried eggs as described below.¹

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

One or more subcategories of this category are listed in the **Annex to Table 3**. Unless specifically indicated below, food additive provisions implied by **Table 3** do not automatically apply to this category.

GSFA Provisions for Food Category 10.2

INS No. ▼	Food Additive or Group	Max Level ▼	Notes ▼	Defined In ▼
150d	Caramel IV - sulfite ammonia caramel	20,000 mg/kg	 Note 161	10.2
160a(ii)	beta-Carotenes, vegetable	200 mg/kg	 Note 341	10.2
243	Lauric arginate ethyl ester	200 mg/kg		10.2
475	Polyglycerol esters of fatty acids	1,000 mg/kg		10.2
476	Polyglycerol esters of interesterified ricinoleic acid	1,000 mg/kg		10.2

Items in uppercase (e.g. **PHOSPHATES**) refer to food additive groups.
