### FOOD CATEGORY DETAILS

#### Seasonings and condiments (12.2.2)

##### Description:

Condiments and seasonings are mixtures of herbs and spices together with other food ingredients (such as salt, vinegar, lemon juice, molasses, honey or sugar, and sweeteners). Examples include meat tenderizers, onion salt, garlic salt, Oriental seasoning mix (dashi), topping to sprinkle on rice (furikake, containing, e.g. dried seaweed flakes, sesame seeds and seasoning), and seasoning for noodles. The term "condiments" as used in the Food Category System does not include condiment sauces (e.g. ketchup, mayonnaise, mustard) or relishes.

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

Items in uppercase (e.g. **PHOSPHATES**) refer to food additive groups.

## GSFA Table 3 Provisions

The following additives, as indicated by **Table 3**, may be used in this food category under the conditions of good manufacturing practice (GMP) as outlined in the Preamble of the Codex GSFA.

| INS No. | Food Additive or Group                   | Acceptable in Foods Conforming to the Following Commodity Standards                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
