

## GSFA Online

Updated up to the 48<sup>th</sup> Session of the Codex Alimentarius Commission (2025)

### FOOD CATEGORY DETAILS

#### Emulsified sauces and dips (e.g. mayonnaise, salad dressing, onion dip) (12.6.1)

##### Description:

Sauces, gravies, dressings, and dips based, at least in part, on a fat- or oil-in water emulsion. Examples include: salad dressing (e.g., French, Italian, Greek, ranch style), fat-based sandwich spreads (e.g., mayonnaise with mustard), salad cream, fatty sauces and snack dips (e.g., bacon and cheddar dip, onion dip).

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

#### GSFA Provisions for Food Category 12.6.1

Items in uppercase (e.g. **PHOSPHATES**) refer to food additive groups.

## GSFA Table 3 Provisions

The following additives, as indicated by **Table 3**, may be used in this food category under the conditions of good manufacturing practice (GMP) as outlined in the Preamble of the Codex GSFA.

| INS No. | Food Additive or Group                   | Acceptable in Foods Conforming to the Following Commodity Standards                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
