FOOD CATEGORY DETAILS

Natural mineral waters and source waters (14.1.1.1)

Description:

Waters obtained directly at the source and packaged close to the source; are characterized by the presence of certain mineral salts in relative proportions and trace elements or other constituents. Natural mineral water may be naturally carbonated (with carbon dioxide from the source), carbonated (with added carbon dioxide of another origin), decarbonated (with less carbon dioxide than present in the water at the source so it does not spontaneously give off carbon dioxide under conditions of standard temperature and pressure), or fortified (with carbon dioxide from the source), and non-carbonated (contains no free carbon dioxide).¹

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

This food category is listed in the **Annex to Table 3**. Unless specifically indicated below, food additive provisions implied by **Table 3** do not automatically apply to this category.

GSFA Provisions for Food Category 14.1.1.1

INS No. ▼	Food Additive or Group	Max Level ▼	Notes ▼	Defined In ▼
290	Carbon dioxide		GMP  Note 466	14.1.1.1

Items in uppercase (e.g. **PHOSPHATES**) refer to food additive groups.

1. Standard for Natural Mineral Waters (CODEX STAN 108-1981).
