FOOD CATEGORY DETAILS

Prepared foods (16.0)

Description:

These foods are not included in the other food categories (01-15) and should be considered on a case-by-case basis. Prepared foods are mixtures of multiple components (e.g. meat, sauce, grain, cheese, vegetables); the components are included in other food categories. Prepared foods require minimal preparation by the consumer (e.g. heating, thawing, rehydrating). Provisions for additives will be listed in this food category in the GSFA only if the additive is needed: (i) solely to have a technological function in the prepared food as sold to the consumer; or (ii) at a use level that has an intentional technological function in the prepared food that exceeds the use level that can be accounted for by carry-over from the individual components.

This page provides information on the food additive provisions that are acceptable for use in foods conforming to the food category.

GSFA Table 3 Provisions

The following additives, as indicated by **Table 3**, may be used in this food category under the conditions of good manufacturing practice (GMP) as outlined in the Preamble of the Codex GSFA.
